Overall experience

What remains unresolved?

1. Launch and Hearth

State

not_started

What was tested, observed, blocked, or skipped?

2. Project Creation

State

not_started

What was tested, observed, blocked, or skipped?

3. Smithy Editor

State

not_started

What was tested, observed, blocked, or skipped?

Production reports generate bounded repeated groups for every assigned section.

Expected result

Observed result

Steps to reproduce

☐

This issue blocked continued testing

Review every selected note and artifact before finalization.
Exclude or redact anything outside the assignment or privacy profile.
Finalize does not imply delivery, receiver acceptance, or a GitHub issue.

☐ **I reviewed the included evidence and completed required exclusions/redactions.**

Tester attestation

Finalization notes

Tarcie will re-open and validate every field, bind values to BetaSessionReport.v1, compute the structured-report and PDF hashes, and request explicit Finalize approval. This documentation prototype does not perform that runtime transaction.
